1.Recommendations for each of these areas:

a) what are your greatest opportunities and challenges for improving retention and graduation (which majors, which equity gaps)

b)what advising solutions might you recommend (if known)

c)which courses should be invited to participate in the critical course redesign (to increase pass rates and reduce equity gaps)

d) which majors have bottlenecks that need to be addressed by scheduling or curriculum revision

2.How can we help in central administration? Are there any additional supports or resources we might be able to provide, this year or moving forward?
