THE LESSON PLAN: PLANNING YOUR START

Next Steps: The Lesson Plan (LP)

By **August 30th**, develop a detailed lesson plan consisting of

- Pre-class guided activities (following format in Talbert or the guided practice for the pre-workshop activities)
- Detailed lesson plan consisting of
  - Learning objectives, background, and introduction
  - Individual space activities and assessments
  - Section for summarizing, muddy points
- Post-class activities, analysis and reflection

This lesson plan should be submitted to your campus FLC:
Silvia (for CSULA faculty) and **Victoria** (for CPP faculty)

Examples of Lesson Plans

- AANAPISI Grant- Faculty workshop Lesson Plans

- Use these as models for your own Lesson Plans

- [Lesson plans](#)

- FLC- check-in and feedback

Next Steps: Start Small

- Think about a lesson plan in your course that you would like to Flip:

    - Break down your course into individual topics and tasks that you want your students to master- pick one topic!

    - Follow Talbert's suggestions: adapt the Significant Learning Model (Ch. 4)

    - Work through the LOs as you did this morning (Ch. 5)

    - Then fill in some background and introduction to the content of your LP

    - Identify tasks/activities related to the LOs

Next Steps: Use your tools

- Use the tools we discussed in the workshop or within the Talbert text (e.g., Castle-top diagram, Guided practice documents)

- Find existing resources, colleagues/buddies who will work with you (check-in with each other)

- Questions?

Next Steps: Start Small

- Think about a lesson plan in your course that you would like to Flip:

    - Break down your course into individual topics and tasks that you want your students to master- pick one topic!

    - Follow Talbert's suggestions: adapt the Significant Learning Model (Ch. 4)

    - Work through the LOs as you did this morning (Ch. 5)

    - Then fill in some background and introduction to the content of your LP

Campus Flip Support & Resources

- **Library PALM** project: Affordable learning solutions with links to videos, free textbooks and other resources such as Merlot. Go to library webpage and click on the PALM link, then select the **faculty resources** tab

- **Library Media Collections**: Has videos such as Khan Academy, but also news clips (to connect topic to real life), etc. From the main library page, select **Collections**, then **Music + Media**, and then **Media Online.** Two collections are recommended for STEM fields: **Films on Demand** and **NBC Learn Higher Ed**

- Your **discipline librarian**
