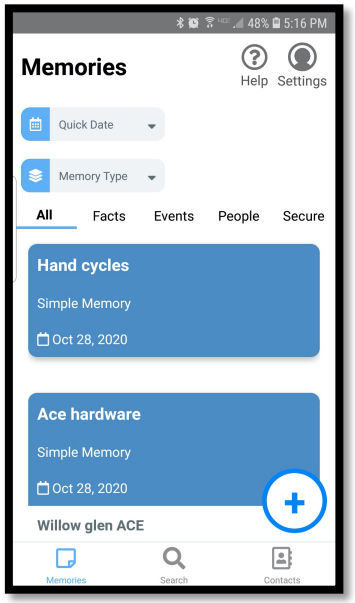
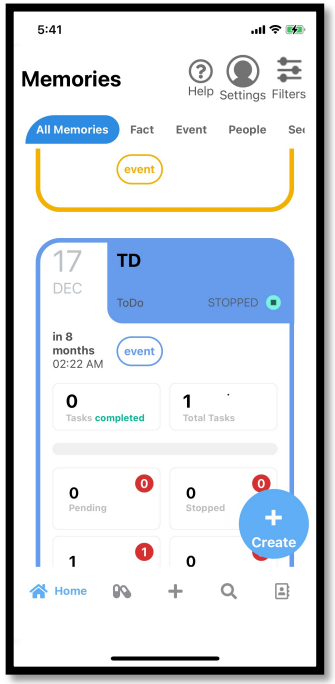
- DEMO
- Future Work / Closing Remarks

Purpose / Overview

- **Help users with:**
  - Traumatic Brain Injury (TBI)
  - Alzheimer's
  - Dementia
  - other cognitive health problems.



old → new



- **How:**
  - Record Memories
  - Track Medications
  - Track Appointments
  - Track ToDo Items
  - Track Interactions

Team Scope of Work

- React Native Learning
- Interface Redesign (UI / UX)
- Memory Templates
- Sort and Filtering
- Code Refactoring
- User Questions and Support
- Agile Methodology

Framework: React Native

- Enables cross-platform development
- React Native is all about achieving reusability using components
- Use of open-source libraries
- Reduced costs and development time
- Strong community

Navigational Flow

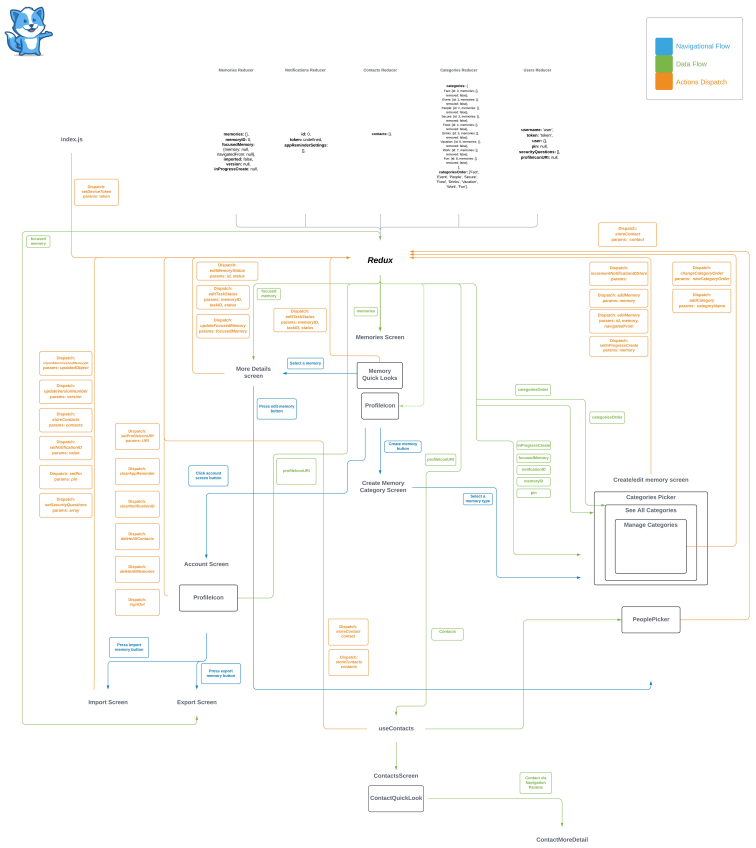
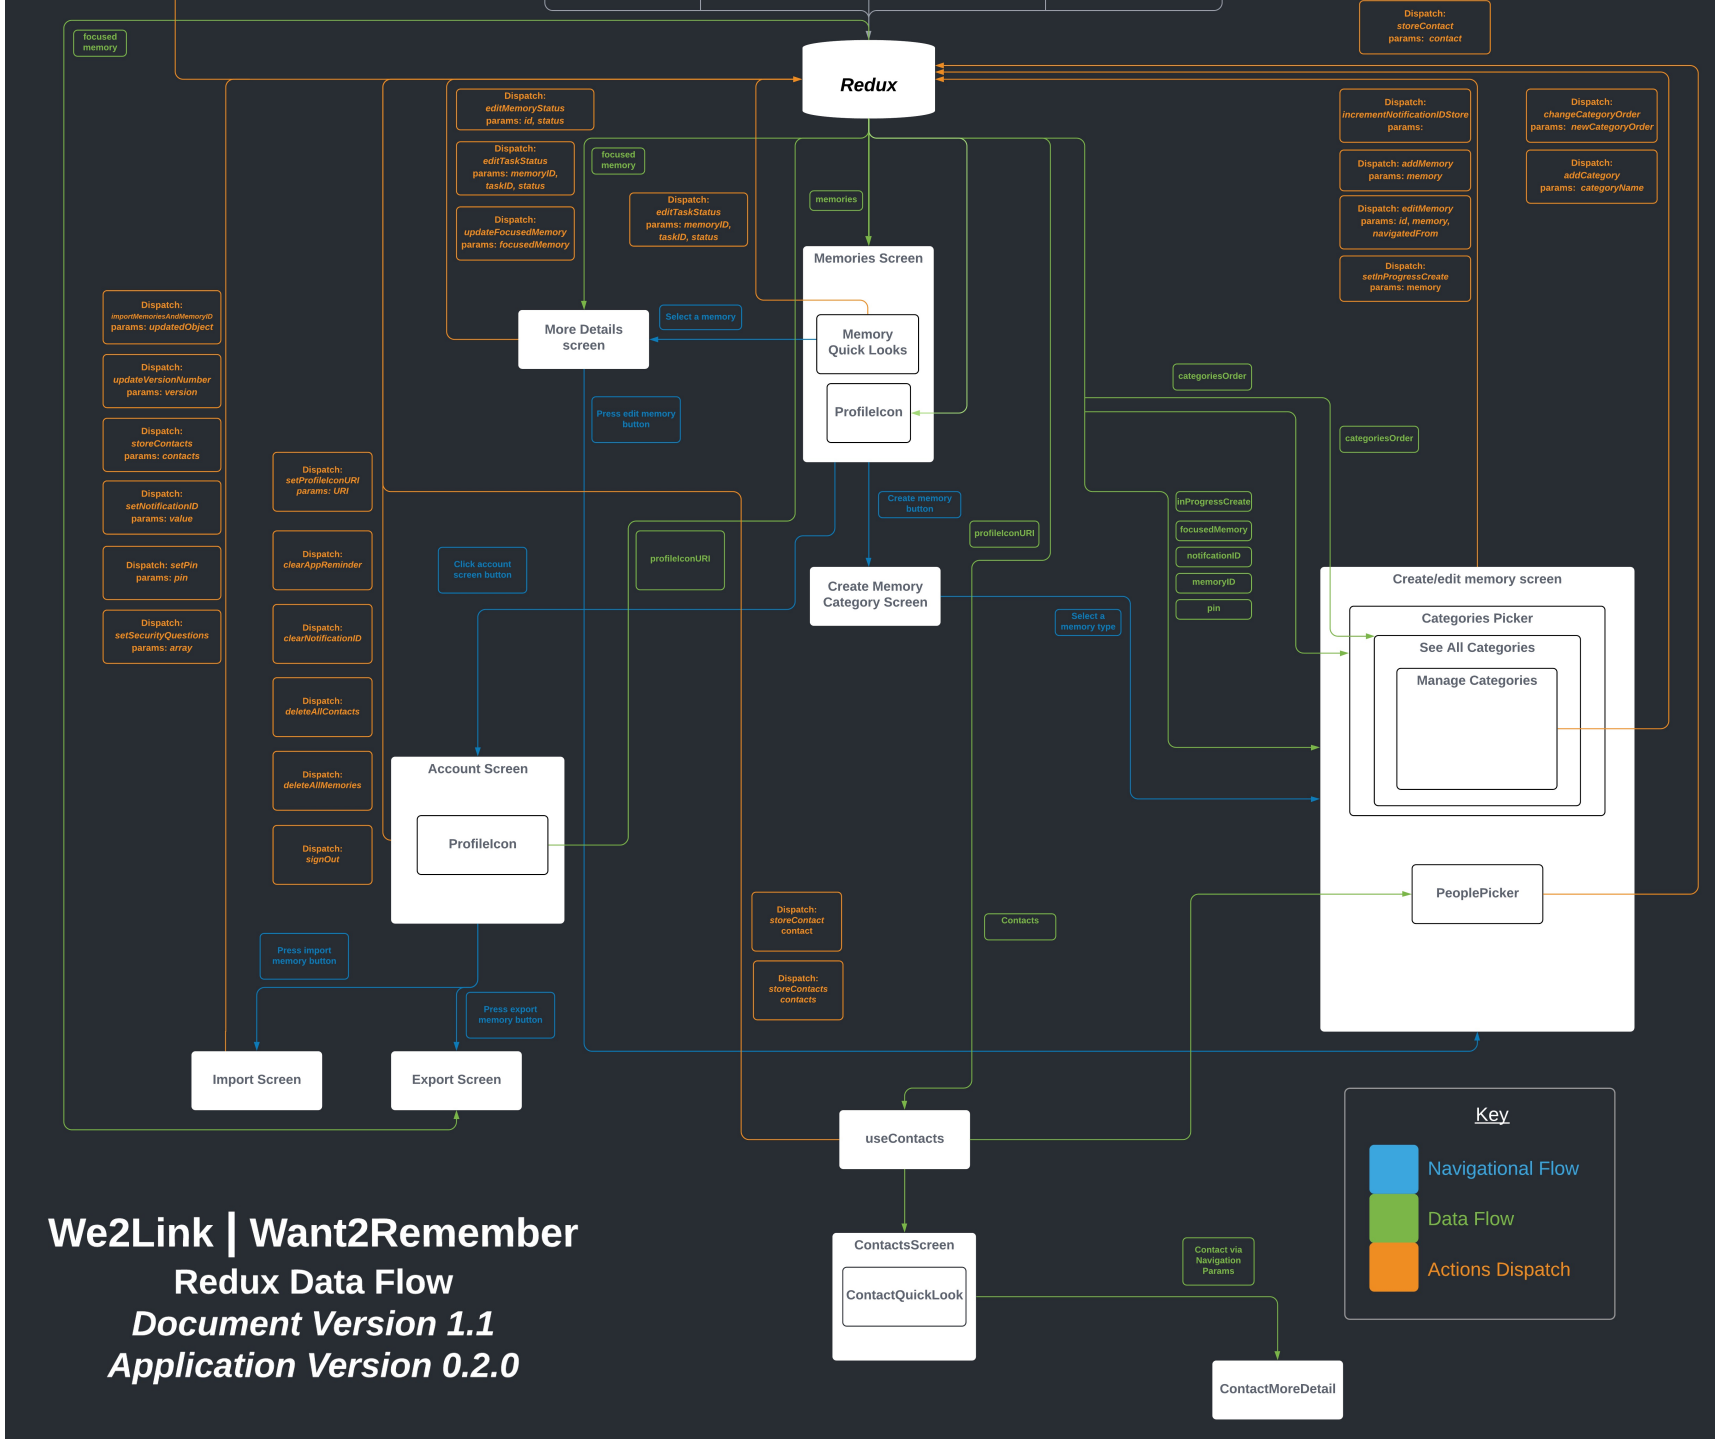
Redux / Data Flow



Redux Data Flow



We2Link | Want2Remember

Redux Data Flow

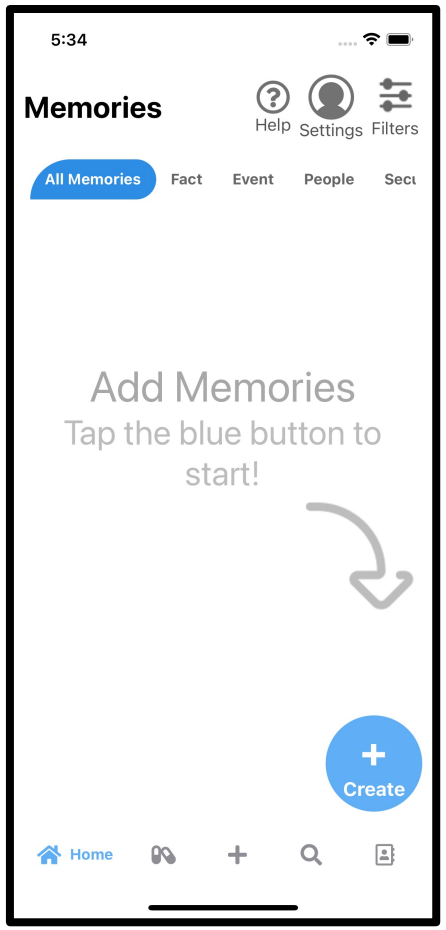
Document Version 1.1

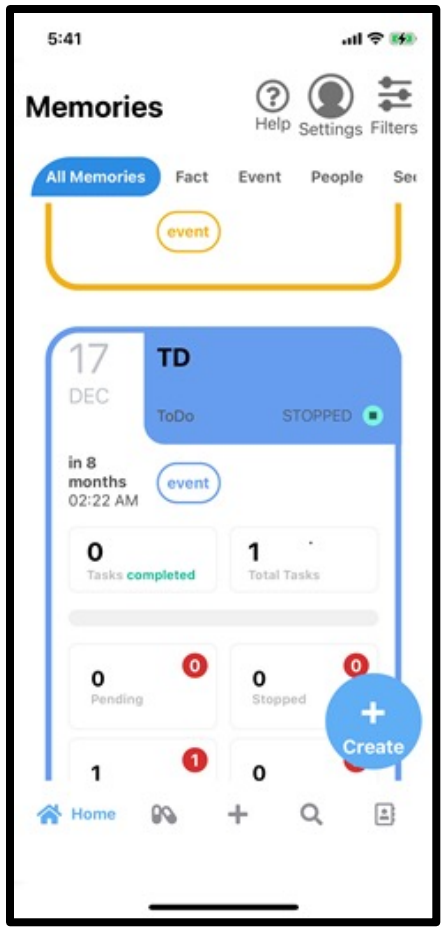
Application Version 0.2.0

Thomas Weatherell

Home Screen and Quicklooks

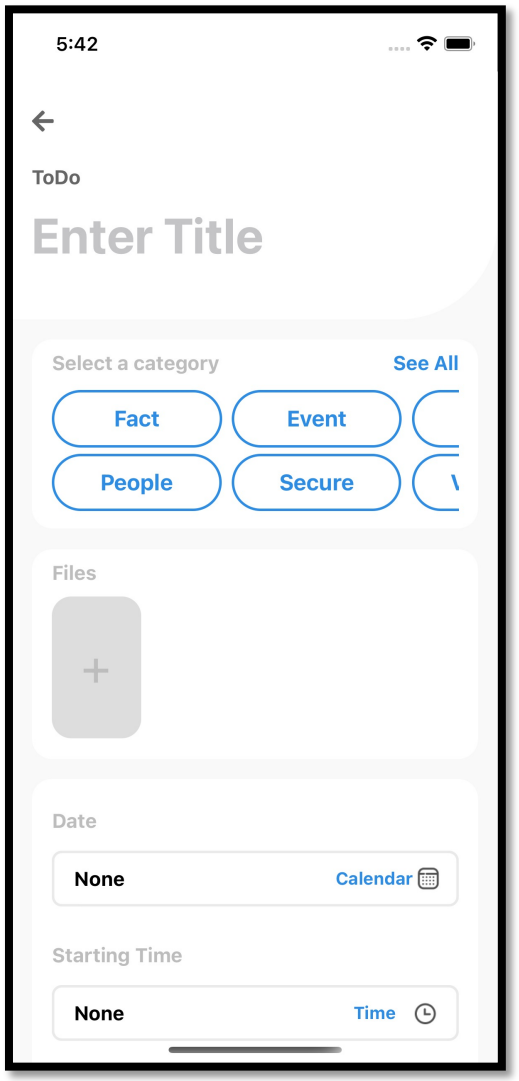
- Start Screen
- Navigate throughout the App from this screen
- Brief overviews of memories





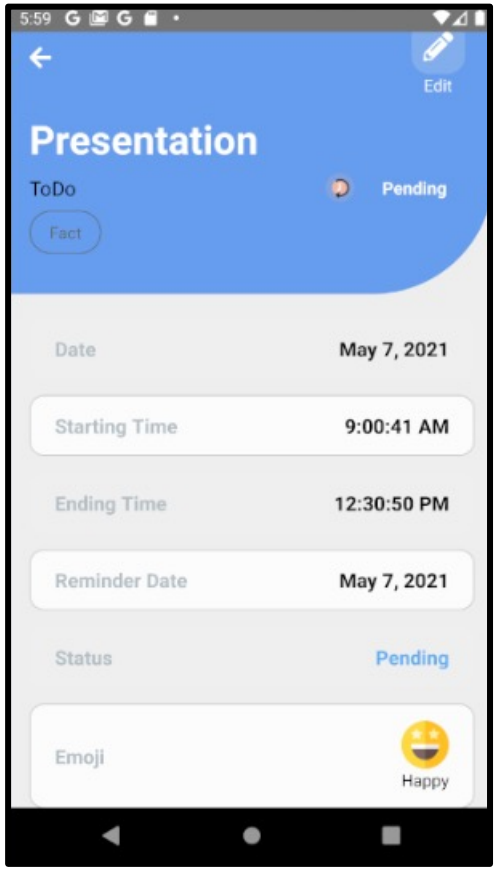
Create Screen

- Multiple Premade templates
  - Generic Memory
  - **ToDo**
  - Interaction
  - Simple Password
  - Etc.
- Keeps track of
  - Date/Time Created
  - People
  - Status



More Details Screen

- Show details held within memories.
  - Passwords
  - Dates
  - Times
  - People
- Can edit and delete memories
- Asks for pin if secure
- Uses template screen similar to create screen



Demo

Connect better! Use We2Link!

The application demo is for demonstration purpose only and may not be an exact representation of the final product.

Future Work / Closing Remarks

- Cloud Support
- Geo Proximity
- Geo Safety
- Advanced Medications
- Machine Learning / Artificial Intelligence

Thank you
